Projects

HTML, CSS | Restaurant Website

- In this project I made a static restaurant website.
- I use the various HTML and CSS tags in this website.
- In this project there are images of the dishes with their price.
- Their is a table from which you can book a table or you can submit your complaint to the restaurant staff.
- I develop this website by my own.

Inderpreet Singh   (514) 910-9179   preetindr4@gmail.com

PHP | Restaurant Website

- In this project we made a restaurant web application to order food online.
- A user can see the description or the ingredients of a dish.
- I worked on the part to fetch data from database to the user screen to show the name and the image of the dishes.
- In this project we are a team two developers.

C# | Online Shopping Application

- In this project there are two panels, one is Admin and other is User.

- Admin can Add the new products in the inventory Section and see how many quantity is sold out.

- User can select the item and save it into the cart and placed the order.

- I worked on the user section. User can see the product and add the products to the cart then user can proceed to the checkout page.

- In the project we are a team of three developers.

React.js | Search a music

- In this project the user can search the song as their choice from Front-end then searched track is fetched from the internet, and displays on the user screen.

- I worked on the part to save a song in database according to the genre

- In this project there is a team of three developers.

Other Experience

Delivery Driver
Apple Express – Montreal

- Loading, transporting, and delivering items
- Reviewing orders
- Customer service
- Following time schedules
- Preparing reports
